CONSULTING SERVICES FOR YOUR DIGITALIZATION STRATEGY

Overcome the boundaries of disciplines, processes and systems to achieve up-to-date, integrated development, production and service for smart systems with PROSTEP strategy consulting.

RECEIVE THE FOLLOWING HANDS-ON SUPPORT:

Digitalization and Industry 4.0 Readiness Check

Receive readiness assessments to help identify your Industrie 4.0 potential

- How prepared are you for digitalization?
- Can your digitalization strategy meet the challenges it may face?

PLM Strategy Consulting

- Development and validation of your PLM strategy in the context of Industry 4.0 and smart engineering.
- Development of a PLM architecture recommendation.
- Selection of an appropriate system and recommendation for a future PLM solution.
- Future-PLM assessment for smart engineering: we identify the concrete need for action in your product development process.

Model Based Systems Engineering

Now more than ever, the development of complex products requires that you overcome the borders of the individual disciplines, processes and systems found within your organization.

- We shape your development process according to the V model, keeping it in line with your company's processes, methods and tools.
- We introduce and deploy Model Based Systems Engineering methodology within your favorite tool-set.
- We overcome system boundaries and operate across different disciplines.
- We organize your system lifecycle management and integrate your data management systems.

ALM, PDM and ERP Integration and Process Design

Integrate data and processes within the framework of your PLM strategy.

Digital Master & Digital Twin: Becoming a Model-based Enterprise

Do your production and service processes already take advantage of digital product?

- We develop a digital master strategy for you and implement it using the appropriate tools.
- We offer PDF- based digital master documents for your build-to-print process.

Partner and customer loyalty

Integrate cooperation partners into your processes and systems – flexibly and systematically.
