

## Quickly Migrate to ARAS Innovator with the Leading Migration Platform for the Discrete Manufacturing Industry

### The Official Toolkit Built Exclusively for ARAS Innovator

The digital landscape is changing fast. Increasing amounts of data are being processed at once while systems technology evolves at an accelerating pace.

Across all industries, from Aerospace & Defense to Automotive, High-Tech, Business Services, Transportation and Mobility, Shipbuilding, and more, the need to migrate towards an innovative, collaborative, and intelligent system is paramount to your continued success.

Enter **ARAS Innovator**, the platform enabling you to manage your multi-site manufacturing and product development so you can connect your supply chains and centralize product design ultimately increasing your productivity, collaboration, and time to market.

Now that you're ready to move forward from your existing system landscape to ARAS Innovator, you'll need a platform built specifically to help move data from your system quickly, efficiently, and securely to the new platform.

The tool most commonly chosen by seasoned professionals in the discrete manufacturing industry is PROSTEP's OpenPDM Migrate.

OpenPDM Migrate gives you the ability to quickly migrate not only individual parts, BOMs, and documents, but also complex product structures and more to ARAS Innovator. Further, with bi-directional data flow, the solution gives you the ability to migrate using the method of your choice - big bang/all at once, incremental, phased, or co-existence migration.

With customized key-performance indicator reporting and full transparency through all processes, your migration is **GUARANTEED** to be smooth, quick, reliable, and error free within project scope, time, and budget.

### 3 Reasons to Use OpenPDM Migrate for Your ARAS Innovator Migration

- Our out-of-the-box connectors connect to virtually any system and easily convert and transfer your data to the ARAS Innovator platform, giving you a hassle-free approach to data migration.
- With bi-directional data flow and connectors 100% compatible with ALL ARAS Innovator objects, OpenPDM Migrate enables you to migrate data at your own pace, using your own migration strategy - big bang, phased, co-existence.
- Proven technology with over 25+ years of experience in data migrations - As a leading ARAS partner, you can rest assured that we guarantee your migration to be certified and maintained using standards and technologies built by the strength of our ARAS partnership.

## What OpenPDM Migrate Can Do For You

OpenPDM Migrate helps you replace your old systems quickly and efficiently without losing data. Built tailored to your processes and your requirements, the solution easily supports the migration of data all at once (big-bang) or incremental with parallel use of old and new systems. Combined with automated data transfer, you'll be able to migrate your data in the shortest amount of time, with the least amount of effort, while maximizing your efficiency and saving costs.

### If You're Facing One or More of these Scenarios, You'll Want to Consider OpenPDM Migrate

- **Merger and Acquisition** - The PLM landscape can get large and complex with bigger companies. As such, if you're facing a situation where you need to consolidate your data gradually, step-by-step, OpenPDM Migrate and the PROSTEP team can assist by giving you the best advice and support when designing your joint PLM infrastructure to harmonize your heterogeneous landscape.
- **System end-of-life, replacement, or upgrade** - Numerous factors can affect the decisions to be made when a company decides to replace their PLM system. The task of a data migration can be so complex that your own company's resources may be constrained. As an expert partner for data migration, PROSTEP understands that and assists your migration by identifying the shortcomings of your existing systems, clarifying stakeholder expectations, and specifying new system requirements.
- **Special cases involving joint ventures, spin-offs, partner integrations, etc.** - Because of the flexibility of OpenPDM Migrate, our vendor neutral connectors easily connect and migrate data from any system to your target system. Built upon years of solid technological partnerships and combined with 25+ years of experience and industry know-how using standardized methodology and best practice, our solutions guarantee a novel approach to solving the most complex migrations.

### The Best Trust PROSTEP - What Other Companies Have to Say:

*We had an extremely low error rate through the migration rehearsals and ultimately through the production migration...*

**Kirk Jones**  
Product Engineering Supers

*...together with consultants from PROSTEP, we have already developed a concept showing how we can use PLM to provide optimum support for our new product engineering process...*
